

ANWARKHAN MOHAMED IHSHAS

Aspiring Software Developer | HND in Information Technology Undergraduate

Annal Street, Kinniya | +94 75 775 1231 | mhdihsas@gmail.com | [Portfolio](#) | [LinkedIn](#)

PROFILE

Motivated final-year HND Information Technology student with hands-on experience across web development, databases, and IT support. Comfortable building responsive front-end interfaces and functional backend logic with HTML, CSS, JavaScript, PHP, and MySQL, and applying core programming and machine-learning concepts through independent projects. Reliable, detail-oriented, and quick to pick up new tools; seeking a six-month internship in Web Development, Software Development, or IT Support to apply these skills in a professional environment and grow into a well-rounded software developer.

EDUCATION

Higher National Diploma in Information Technology (HNDIT) — *Sri Lanka Institute of Advanced Technological Education (SLIATE) — Trincomalee*
Jul 2024 – Sep 2026

TECHNICAL SKILLS

- **Programming Languages:** PHP, Java, Python (basic)
- **Web Development:** HTML, CSS, JavaScript, PHP
- **Databases:** MySQL, phpMyAdmin
- **Tools & Platforms:** Git/GitHub, XAMPP, Firebase (FCM), REST APIs
- **IT Support:** Windows installation and configuration, software deployment, hardware troubleshooting, printer setup, end-user support

ACADEMIC PROJECTS

TaskFlow — Task Management Web Application — *First-Year Project*
Jul 2024 – Jan 2025
HTML • CSS • JavaScript • Local Storage

- Designed and built a responsive, browser-based application for managing daily tasks, deadlines, and priorities.
- Implemented full CRUD functionality for creating, editing, and deleting tasks, with status and priority tracking.
- Added search, filtering, sorting, and dashboard statistics to surface completed and overdue tasks at a glance.
- Used browser Local Storage to enable offline access and persist task data without a backend server or database.

TrustHire AI — Recruitment Fraud Detection System — *Final-Year Project*
Apr 2026 – Sep 2026
Python • Flask • HTML • CSS • JavaScript • SQLite • Machine Learning

- Designing an AI-based web application that identifies potentially fraudulent job advertisements.
- Building a machine-learning pipeline using TF-IDF vectorization and Logistic Regression for text classification.
- Developing a Flask backend with SQLite database storage and multi-user scan history.
- Incorporating input validation, fraud-risk scoring, and an interactive dashboard built with JavaScript and AJAX.

CORE STRENGTHS

- Foundational web and software development knowledge, with a growing interest in machine learning
- Computer troubleshooting and IT support skills
- Quick learner, adaptable to new technologies and tools
- Strong problem-solving ability and collaborative, team-oriented approach
- Responsible, punctual, and dependable under deadlines

LANGUAGES

- **Tamil** — Native
- **English** — Working Proficiency
